TIMECODE

DIALOGUE

START TIMECODE 00.00.00 AT FIRST FRAME OF PICTURE

**TEASER**

00.15.21      TECHNICIAN- Chevron six, encoded.

00.18.09      HAMMOND- Glad you could make it, Colonel.

00.19.15      O'NEILL- Wouldn't miss it, sir. This is my favorite part.

00.27.24      TECHNICIAN- Chevron seven, locked.

00.35.04      CARTER- Proceeding with Malp transit.

00.46.18      TECHNICIAN (OS)- Malp on route.

00.48.27      O'NEILL- You look tense.

00.51.18      DANIEL- No, I'd say anxious.

00.55.00      TEAL'C- I am neither tense nor anxious. Perhaps concerned.

01.00.26      DANIEL- Why?

- 01.02.13           TEAL'C- The address of this planet was procured from the repository of the Ancients.
- 01.06.03           TECHNICIAN- Receiving Malp telemetry.
- 01.15.17           DANIEL (OS)- Nothing I can see resembles anything we know about the Ancients.  
DANIEL (CONT)- Architecture, technology, writing.
- 01.22.12           CARTER (OS)- Maybe what we're looking at...  
CARTER (CONT)- came to this planet after the Ancients left it.
- 01.25.17           HAMMOND- Do you recognize any of this?
- 01.27.14           TEAL'C- I do not, General Hammond.
- 01.29.23           O'NEILL- Nope. Neither do I. I'm just saying...
- 01.41.08           HAMMOND- What's it doing?
- 01.42.21           CARTER- Flying, sir.
- 01.44.09           O'NEILL- Malps can't fly.
- 01.45.16           DANIEL- Apparently they can.

01.49.15 O'NEILL- Shouldn't there be a memo on this stuff?

01.51.18 TEAL'C- I do not believe we are still in control.

01.53.21 CARTER- Run a systems diagnostic on the Malp.

02.03.14 O'NEILL- It stopped transmitting.

02.05.04 CARTER (OS)- Negative, sir.

CARTER (OS CONT)- We're still getting a strong signal. We should be receiving  
video.

02.09.16 TECHNICIAN- Ah, Major, you should take a look at this.

02.13.07 CARTER (OS)- Sir, very high frequency oscillations...

CARTER (CONT)- are being transmitted on a feedback...

CARTER (OS CONT)- loop.

02.17.14 DANIEL- They may be trying to communicate.

02.19.12 O'NEILL- They?

02.20.07 DANIEL- Well, whoever they are.

02.22.05 O'NEILL- Exactly.

02.23.25 DANIEL- What?

02.24.20 CARTER- Sir, I recommend we disengage the Stargate and analyze this data before proceeding.

02.29.00 HAMMOND- Agreed. Terminate the link.

02.33.10 CARTER (OS)- Whoa! We've got an...

CARTER (CONT)- EM spike! The system is overloading.

02.36.06 O'NEILL- Shut it down!

02.37.01 TECHNICIAN- I can't get in.

02.38.04 CARTER- Try override!

02.38.26 TECHNICIAN- Control systems are locked out!

02.49.00 CARTER- The computer's no longer under our control.

02.50.28 O'NEILL- Emergency disconnect, sir.

02.52.09           HAMMOND- Do it. Major, are you okay?

02.57.05           CARTER- Yes, sir.

**OPENING CREDITS**

**ACT ONE-**

04.30.13           FRAISER- Let's get him to the infirmary. He's got first and second-degree burns, sir.  
                          Mostly superficial. But I would like to run some more tests.

04.39.20           HAMMOND- Very well.

04.43.26           CARTER- The stargate control systems and their redundancies are inoperative,  
                          including the Iris. The circuitry in these terminals has been completely fused.

04.51.11           O'NEILL- Any idea what that was?

04.53.04           CARTER- None, sir. The secondary systems are up and running, but that was one  
                          helluvan EM spike.

CARTER (OS CONT)- I'd like to run a full systems diagnostic on the main computer.

05.00.28           FRASIER- Yeah, after I treat this hand.

05.03.01 CARTER- As soon as I get the systems up...

05.04.07 FRASIER (OS)- It is a very bad burn, Sam.

05.05.29 CARTER- Five minutes.

05.06.19 FRASIER- Now!

05.07.18 O'NEILL- Do as the doctor says.

05.09.24 CARTER- Yes, sir.

05.11.10 FRASIER- Thank you, Colonel.  
FRASIER (OS CONT)- You, Daniel and Teal'c are next.

05.15.01 DANIEL- What? I'm...

05.17.05 O'NEILL- We're fine.

05.17.27 FRASIER- Yeah, well, I would like to be the judge of that. Some form of energy came  
through the stargate. I think it's only prudent to make sure there's no  
physiological effects to those exposed. ASAP.

05.30.09 O'NEILL- Who put her in charge?

- 05.32.08 HAMMOND- The U.S. Air Force.
- 05.34.27 TEAL'C- In medical matters, Dr. Frasier may overrule those of any rank.
- 05.43.27 O'NEILL- I'm not getting all my memos.
- 05.52.23 FRASIER (OS)- Well, by the looks of the control room, I'd say you're both very lucky.
- 05.57.23 TECHNICIAN- I guess it could have been worse.
- 06.00.22 CARTER- I'd like to know what it was trying to do in the first place. Unfortunately, our  
best diagnostic tool for figuring that out has been trashed.
- 06.07.24 FRASIER- You're all done here.
- 06.08.27 CARTER- Thanks.
- 06.16.04 TEAL'C- Reporting as requested.
- 06.17.17 FRASIER (OS)- Thanks, Teal'c. Just have a seat, please.

06.34.09 DANIEL- Can you freeze it just before it cuts out? I want to get a video capture of this hub thing.

DANIEL (OS CONT)- I might be able to cross reference the architecture.

DANIEL (CONT)- No, on second thought, I don't think this thing is even remotely connected to Ancient Earth.

06.52.23 CARTER (OS)- There! This is the start of the strange high frequency oscillations.

CARTER (CONT)- They began seconds after we lost video and started to multiply exponentially.

CARTER (OS CONT)- After that, the oscillations maxed out our equipment and made it impossible to measure them.

CARTER (CONT)- Now, if I isolate the smaller, more detailed signal and expand the time line... There. It's a wave form of some kind.

07.18.10 DANIEL- The Alien signal.

07.19.17 CARTER- Piggybacked on the Malp telemetry. That must be how it managed to come back through an outgoing wormhole. I can't properly analyze it until I get the computers back up. My hands are tied.

07.29.20 DANIEL- Well, there are other computers in the world.

07.31.27 CARTER- Not that I can access. General Hammond's put the SGC under...

CARTER (OS CONT)- quarantine.

07.51.19 HAMMOND- So, information was accessed?

07.53.18 DANIEL- Apparently.

07.55.14 HAMMOND- Why? By what?

07.56.27 CARTER- We don't know, sir, but it branched out through very specific areas. Network  
and language software, followed by system and application software.

08.04.06 DANIEL- Learning to read. Learning to talk

08.06.15 CARTER- And knowledge...  
CARTER (OS CONT)- of our systems.

08.08.10 HAMMOND- You're saying something was inside our computers?

08.11.10 DANIEL- Well, we're just guessing at this point, but, ah...

08.13.22 CARTER- Whatever it was, we managed to interrupt it before it could complete its  
entire scan of our computer.

08.18.13 HAMMOND- Were you able to determine anything further from the Malp  
transmissions?

- 08.22.07 DANIEL- Not a single reference, on or off world, that even remotely resembles the architecture. It's entirely...  
DANIEL (OS CONT)- Alien.
- 08.27.17 CARTER (OS)- We're running a virus scan and purging the entire mainframe. It's a long process.  
CARTER (CONT)- Our file allocation tables were corrupted by the surge, and there are sectors we'll never be able to recover.
- 08.42.11 HAMMOND- I'm maintaining DEFCON 2, and keeping the mountain locked down until you can tell me with confidence there'll be no further repercussions.
- 08.50.04 CARTER- Yes, sir.
- 09.12.22 O'NEILL- So, it's a probe?
- 09.15.10 DANIEL- No, we're saying it's like a probe. We actually don't know what to call it.
- 09.18.24 CARTER- We do know that before we were able to cut it off, a structured EM wave managed to navigate over half of our computer system.
- 09.25.22 TEAL'C- For what reason?
- 09.27.15 DANIEL- Well, we sent a probe to their world.

09.29.13 O'NEILL- So, we're calling it a probe?

09.33.11 DANIEL- Sure.

DANIEL (OS CONT)- Um, the point is, we don't know what would have happened if we hadn't interrupted it.

09.37.26 HAMMOND- It did an awful lot of damage.

09.39.22 TEAL'C- Perhaps that was the intention.

09.41.21 CARTER- Or maybe it was intended to have been passive, but just so advanced that it overwhelmed our systems. We really have no way of knowing.

09.48.23 FRASIER- Now, what is this?

09.50.06 CARTER (OS)- Those are the high frequency oscillations...

CARTER (CONT)- we received. They're time magnified and scaled for detail.

09.55.03 FRASIER- It looks like high amplitude tracings of an EEG.

09.58.06 DANIEL- Like a brain wave?

10.00.00 FRASIER- Yeah.

10.04.15 O'NEILL- Hello?

10.16.24 CARTER- It's still here.

10.18.17 O'NEILL- What? The probe?

10.20.00 CARTER (OS)- Well, whatever it is. It must have been sustaining itself within our  
secondary systems while we were...

CARTER (CONT)- cleaning up the main computer.

10.37.29 O'NEILL- Do I look fat?

10.40.08 DANIEL- It's like it wants us to know that it's here.

10.51.07 O'NEILL- Come here often? Yeah. All right. That's me.

11.36.29 SILER- Beg your pardon, sir. The dialing sequencer...

SILER (OS CONT)- just went down.

11.40.16 HAMMOND- Take it off line, Sergeant.

11.42.01 SILER- Yes, sir.

11.49.27 DANIEL- It's learning.

11.51.24 O'NEILL- Leaning what?

11.53.12 DANIEL- Uh, about us. Who we are. What we do here.

11.57.20 HAMMOND- Put a stop to it, Major.

12.00.03 CARTER- Yes, sir.

12.01.25 DANIEL- Ah, we don't even know its intentions.

12.04.13 HAMMOND- Doctor, I can't allow an alien technology into our computer systems,  
whatever its intentions.

HAMMOND (OS CONT)- Have we maintained quarantine?

12.32.06 CARTER (OS)- Yes, sir. For the moment we're still isolated.

12.35.05 HAMMOND- I don't want to risk contamination to the outside world. I want whatever  
this is stopped right here, right now.

12.43.24 O'NEILL- I think it likes me.

12.51.19 CARTER- From what I can decipher...

CARTER (OS CONT)- sir, it's like a computer program. Incredibly...

CARTER (CONT)- invasive, but as complex as a DNA strand. And it's growing. It's eating more and more memory.

13.01.02 HAMMOND- Can you remove it?

13.02.00 CARTER (OS)- Well, this will take a complete shutdown of...

CARTER (CONT)- all systems connected to the mainframe, followed by a low level format of all drives. Unfortunately, sir, any and all data not properly backed up before this event will be destroyed, but it's the only way to be sure.

13.16.15 HAMMOND- Understood. Do it.

13.18.24 CARTER- We'll be out of commission for a while, sir.

13.21.05 HAMMOND- I've already alerted all off-world teams to stay put until further notice.

13.25.21 CARTER- Yes, sir.

CARTER (OS)- Sergeant?

13.28.03 SILER- Stand by for base wide systems power down.

SILER (OS CONT)- Powering down.

13.42.04 O'NEILL- Hey...!

**END OF ACT ONE**

**ACT TWO**

14.15.17 SILER- All scans came back clean, sir.

14.17.11 HAMMOND- Thank you, Sergeant.

14.18.19 CARTER- We may have only lost data from the last twenty-four hours before the event. We'll know more when I can hook back up with the SGC archives in the pentagon.

14.26.07 HAMMOND- I'd like you and Sergeant Siler to double check your results before we do that.

14.30.15 CARTER- Yes, sir.

14.32.25 SILER- Major!

14.38.18 CARTER- You're kidding!

- 14.50.09 O'NEILL (OS)- Carter!  
O'NEILL (CONT)- Emergency lighting?
- 14.54.14 CARTER- In the Malp room, yes, sir. A small power usage anomaly. General  
Hammond said we should check it out before we resume normal operations.
- 15.01.00 O'NEILL- Forget to change light bulbs, Siler?
- 15.02.23 SILER- That's not my job, sir. Yes, sir. Light bulb. Very amusing.
- 15.19.28 O'NEILL- It's warm.
- 15.20.24 CARTER (OS)- Fire?
- 15.21.23 SILER (OS)- Alarms would be going off by now, Major.
- 15.25.03 O'NEILL- It's been welded from the inside.
- 15.27.21 CARTER- By who? There's been nobody on this level since the power shutdown.
- 15.31.18 O'NEILL- Get a torch. What is it?
- 16.58.13 CARTER- I don't know, sir. I think we robbed the Alien program of an environment, so  
it created one.

17.10.12 TEAL'C- It appears to be sustaining itself from the electric power...

TEAL'C (OS CONT)- from the emergency light system.

17.16.22 CARTER- It must have gotten into a Malp, survived on battery power while we were  
shut down and built this... memory main frame while were...

CARTER (OS CONT)- on emergency power.

17.26.01 O'NEILL- Memory mainframe?

17.27.20 CARTER- I know for a fact that we wiped out a ton of it.

CARTER (OS CONT)- This program must use incredible compression. It must be able  
to reproduce itself from a fraction of its original size.

CARTER (CONT)- And now it's expanding into whatever available memory it can find.

17.41.02 O'NEILL- Okay. General, we're gonna need to some Claymores down here.

17.46.21 HAMMOND (VO FILTERED THRU WALKIE)- I'm on my way.

17.48.26 DANIEL- You want to blow it up?

17.52.00 O'NEILL- Yes.

17.52.24 DANIEL- Why?

- 17.53.28 O'NEILL- Why?
- 17.55.13 CARTER- Sir, we've completely isolated this area of the base. There is no chance of re-infection of our computer.
- 18.00.23 DANIEL- It's obviously fighting to survive.
- 18.04.03 O'NEILL- So do bacteria.
- 18.15.15 CARTER- It's trying to communicate.
- 18.17.16 O'NEILL- So do bact...
- 18.19.18 CARTER- Sir, I agree with Daniel. This is a life form. Obviously intelligent. Now we've been in the exact same position as this alien entity, I don't know how many times, on another planet, cut off from our world, trying to stay alive.
- 18.34.23 HAMMOND- What in God's name?
- 18.38.00 O'NEILL- Well, General, whatever got into our computers apparently has built a nest.
- 18.54.04 HAMMOND- Overnight?

- 18.55.18 CARTER (OS)- According to the security...  
CARTER (OS CONT)- log, there hasn't been any human activity in the Malp room for  
over thirty-six hours.
- 19.00.21 O'NEILL- For the record, sir, I want to blow it to hell. These folks want to chat with it.
- 19.07.02 HAMMOND- Are you absolutely certain it can't reconnect to our computers?
- 19.12.02 O'NEILL- General?
- 19.15.17 CARTER- It's surviving on an...  
CARTER (OS CONT)- emergency circuit which is battery powered, so it's isolated  
from the...  
CARTER (CONT)- rest of the base. We can kill it just by severing that connection.
- 19.25.16 HAMMOND- How do you intend to proceed?
- 19.27.11 CARTER- Well, sir, it's provided an interface.  
CARTER (OS CONT)- I'd like to at least try to make contact with it.  
CARTER (CONT)- If anything goes wrong, we cut the power.
- 19.35.28 HAMMOND- Very well.
- 20.20.01 DANIEL- Maybe it's trying to figure out why we sent a probe to its world.

20.33.13 HAMMOND- Major Carter?

20.43.24 O'NEILL- Carter!

20.49.16 FRASIER- Start an EKG and EEG! Okay, on my count. Three, two, one...

FRASIER (OS CONT)- We in?

FRASIER (CONT)- Charge the paddles one hundred. Take over. It's normal sinus rhythm. Sir...

21.49.01 O'NEILL- What? What is it?

21.51.19 FRASIER- These readings match those that infected our computers in the first place.

It's inside her.

**END OF ACT TWO**

**ACT THREE**

22.18.15 FRASIER (OS)- These weaker readings are Major Carter's. These are the...

FRASIER (CONT)- entity's.

22.23.15 DANIEL- How can a computer program be inside a human brain?

22.26.21 CARTER- Sam said the entity was looking for memory within which to expand, and the human brain is capable of storing terabytes of information.

- 22.33.11 HAMMOND- How do you intend to remove it?
- 22.35.19 FRASIER- I doubt it's even possible, sir. More and more of her brain is being stimulated, and it's impossible to tell whether her memory is being suppressed, overwritten, or erased entirely.
- 22.45.11 TEAL'C (OS)- General Hammond.  
TEAL'C (CONT)- I recommend that Major Carter be placed under armed guard.
- 22.50.09 DANIEL- What?
- 22.52.06 TEAL'C- If an alien entity has somehow invaded her body, then she is a security risk, and must be treated as such.
- 22.59.03 HAMMOND- I agree with Teal'c. The entity has fooled us twice. I'll be damned if I'll let it do it again. She's to remain under guard at all times.
- 23.08.24 FRASIER- Yes, sir.
- 23.33.19 O'NEILL- Carter? She's conscious. Can you talk?

- 23.57.28 FRASIER- Colonel, her PET scan resembles that of someone who's been the victim of a stroke. Parts of her brain seem very active. Others...  
FRASIER (OS CONT)- seem dormant or suppressed. The entity does have...  
FRASIER (CONT)- complete motor control. However, it might be able to communicate with a speech synthesizer if I explain its operation.
- 24.16.28 O'NEILL- Just concentrate on getting it out of here, will ya?
- 24.21.02 FRASIER- I don't know how, sir.
- 24.26.23 O'NEILL- What about the Tok'ra or Asgard? Don't they owe us a favor by now?
- 24.30.08 HAMMOND- Till this situation's resolved, Colonel, we're still under quarantine.  
HAMMOND (OS CONT)- That means from our allies as well.  
HAMMOND (CONT)- We cannot risk the entity leaving this facility.
- 24.52.12 SILER- Looks like it used a capacitor from the Malp to deliver a charge right through the keyboard, sir.
- 24.57.22 O'NEILL- Well, don't touch it.
- 24.59.13 SILER (OS) Yes, sir.
- 25.00.20 DANIEL- Sam said it was growing. Expanding.

- 25.04.20           TEAL'C- Perhaps the entity that possessed her sensed that Major Carter's mind was a more efficient memory storage vessel.
- 25.10.03           O'NEILL- It was a trap.
- 25.12.14           DANIEL- A trap?
- 25.14.03           O'NEILL- Yep. It was watching us the whole time.
- 25.19.13           DANIEL- Ah, so you're saying it knew Sam and I wanted to make contact with it?
- 25.24.10           O'NEILL- Yeah.
- 25.25.19           TEAL'C- And this device was created as a delivery system in order to invade the body of Major Carter.
- 25.30.13           O'NEILL- Yes.
- 25.31.17           DANIEL (OS)- So, basically, what you're saying is that...  
DANIEL (CONT)- if we'd just listened to you in the first place and blown it up... No, seriously, I'm... I'm asking you. Is that what you're saying?
- 25.41.02           TEAL'C (OS)- If we had destroyed the entity, Daniel Jackson...  
TEAL'C (CONT)- Major Carter would not have been adversely affected.

- 25.48.00 DANIEL- Okay, look. I know your first instinct is to protect. Both of you.  
DANIEL (OS CONT)- That's... that's your job. That's what you do, but...  
DANIEL (CONT)- No matter what happens, no matter how this turns out, Sam wasn't  
wrong to try to communicate with it.
- 26.39.25 CARTER/ENTITY (VO FILTERED THRU SYNTHESIZER)- O'Neill.
- 26.42.00 O'NEILL- That's right. Go get the doc. And you are?
- 26.54.21 CARTER/ENTITY (VO FILTERED THRU SYNTHESIZER)- I am within. You are  
O'Neil.
- 27.01.24 O'NEILL- Yeah.  
O'NEILL (OS CONT)- We've established that.
- 27.06.11 CARTER/ENTITY (VO FILTERED THRU SYNTHESIZER)- This one has memory of  
you.
- 27.08.28 O'NEILL- The one you are talking about is a person. Her name is Samantha Carter.
- 27.16.18 CARTER/ENTITY (VO FILTERED THRU SYNTHESIZER)- Then, I am Major...
- 27.18.23 O'NEILL- No! No, you're not.

- 27.25.16 FRASIER- We understand that you've taken control of Major Carter. But you're not her.
- 27.32.08 CARTER/ENTITY (VO FILTERED THRU SYNTHESIZER)- There was no other choice. No other place to go. You wished to terminate.
- 27.41.04 O'NEILL- Still do.
- 27.45.03 CARTER/ENTITY (VO FILTERED THRU SYNTHESIZER)- But you will not. Not now. I have observed. You value the life of one.
- 27.57.14 O'NEILL- Yes, we do.
- 28.01.09 CARTER/ENTITY (VO FILTERED THRU SYNTHESIZER)- This one is important.
- 28.05.14 O'NEILL- She is.
- 28.10.14 CARTER/ENTITY (VO FILTERED THRU SYNTHESIZER)- For this reason, this one was chosen. You will not terminate this one in order to destroy me.
- 28.22.04 FRASIER- It went into Sam out of self-preservation.

28.27.02 CARTER/ENTITY (VO FILTERED THRU SYNTHESIZER)- I cannot be removed from this mind without terminating. You will not terminate this one. None of you will. Therefore I will survive.

**END OF ACT THREE**

**ACT FOUR**

28.57.29 FRASIER- The entity insists Sam's mind is intact, but I can't detect anything beyond the barest trace. I believe even if I was somehow able...

FRASIER (OS CONT)- to remove it, she would be, essentially, brain dead.

29.11.27 HAMMOND- I see.

29.14.07 DANIEL- Then why does the entity insist that Sam's mind is still within?

29.19.07 O'NEILL- It's the only way to keep us from killing it.

29.21.11 DANIEL- Or, it's telling the truth...

DANIEL (OS CONT)- and we just can't detect it.

29.24.16 FRASIER (OS)- Yeah, well even if Sam is...

FRASIER (CONT)- still in there somewhere, it won't be for long. The entity's influence is still growing within her mind, and there is nothing I can do to stop it.

29.33.19 TEAL'C- What course of action remains?

29.35.21 DANIEL- Well, it wants to survive, so we offer to send it home.

29.39.27 HAMMOND- This alien technology is capable of traveling back to us through an outgoing wormhole. I won't risk the same thing happening again. I've already ordered that the coordinates be locked out of the dialing computer.

29.54.24 DANIEL (OS)- Let me talk to it.

DANIEL (CONT)- Maybe we can convince it to leave willingly.

30.01.24 HAMMOND- Very well, Dr. Jackson. Dismissed. Jack.

30.13.02 O'NEILL- Sir?

30.15.08 HAMMOND- We may have to make some difficult choices. I know that Major Carter means a great deal to you.

30.23.16 O'NEILL- She's a very valuable member of my team, sir.

30.27.07 HAMMOND- Yes, she is.

31.02.02 DANIEL (OS)- My name is Daniel.

- 31.07.03 CARTER/ENTITY (VO FILTERED THRU SYNTHESIZER)- I am aware.
- 31.09.17 DANIEL- Right, you, ah... You read my file.
- 31.14.19 CARTER/ENTITY (VO FILTERED THRU SYNTHESIZER)- Yes.
- 31.15.16 DANIEL- Then you know I am a scientist.
- 31.20.15 CARTER/ENTITY (VO FILTERED THRU SYNTHESIZER)- Yes. You have determined  
I cannot be extracted.
- 31.29.17 DANIEL- Yes.
- 31.34.21 CARTER/ENTITY (VO FILTERED THRU SYNTHESIZER)- I will now offer information  
in exchange for continued survival.
- 31.41.14 DANIEL- We don't want your information. We want Sam.
- 31.47.13 CARTER/ENTITY (VO FILTERED THRU SYNTHESIZER)- Leaving this mind would  
cause termination.
- 31.51.06 DANIEL (OS)- You left that thing you constructed in the Malp room.  
DANIEL (CONT)- Go back.

- 32.00.16 CARTER/ENTITY (VO FILTERED THRU SYNTHESIZER)- I have already grown  
beyond its capacity.
- 32.08.24 DANIEL- Why... Why did you do this? Why did you come here in the first place?
- 32.14.20 CARTER/ENTITY (VO FILTERED THRU SYNTHESIZER)- You attacked.
- 32.16.00 DANIEL- No, we sent a probe.
- 32.19.16 CARTER/ENTITY (VO FILTERED THRU SYNTHESIZER)- Yes?
- 32.22.12 DANIEL- It's, ah...something we do to determine whether or not a place is safe for  
humans.
- 32.34.00 CARTER/ENTITY (VO FILTERED THRU SYNTHESIZER)- Radio energy was emitted  
from your probe. Contagion. Much damage was caused within.
- 32.43.26 DANIEL- Within what?
- 32.48.11 CARTER/ENTITY (VO FILTERED THRU SYNTHESIZER)- Within us. It spread before  
we understood it was poison.
- 32.56.00 DANIEL- You're saying your world was damaged by radio waves from one probe?

- 33.02.05 CARTER/ENTITY (VO FILTERED THRU SYNTHESIZER)- Yes.
- 33.03.24 DANIEL (OS)- Well, we didn't mean to hurt you. It was, ah... It was a misunderstanding.
- 33.08.09 CARTER/ENTITY (VO FILTERED THRU SYNTHESIZER)- Yet, it is done.
- 33.10.21 DANIEL- So you came here to... To what?
- 33.15.26 CARTER/ENTITY (VO FILTERED THRU SYNTHESIZER)- Preserve.
- 33.17.03 DANIEL- Preserve your world?
- 33.19.22 CARTER/ENTITY (VO FILTERED THRU SYNTHESIZER)- Yes.
- 33.20.23 DANIEL- How?
- 33.24.10 CARTER/ENTITY (VO FILTERED THRU SYNTHESIZER)- By destroying you.
- 33.32.26 O'NEILL- Well, that's not going to happen.
- 33.38.14 CARTER/ENTITY (VO FILTERED THRU SYNTHESIZER)- Transmission was interrupted. If I had been able to complete transmission, you would have been destroyed. My world would have been preserved.

- 33.51.13 DANIEL- Well, in... In a way you succeeded.
- DANIEL (OS CONT)- We won't go back there.
- DANIEL (CONT)- You can repair the damage we did and we... we won't send any  
more probes through.
- 34.01.05 O'NEILL- Yes, we will.
- 34.04.18 DANIEL- Jack?
- 34.06.14 O'NEILL- We'll send dozens of them. One after another. I don't care what it does.
- 34.16.10 CARTER/ENTITY (VO FILTERED THRU SYNTHESIZER)- No.
- 34.17.03 O'NEILL- Leave her. Now.
- 34.19.28 CARTER/ENTITY (VO FILTERED THRU SYNTHESIZER)- You won't.
- 34.22.04 O'NEILL- You've read my file. Think again.
- 34.25.20 CARTER/ENTITY (VO FILTERED THRU SYNTHESIZER)- I must preserve.
- 34.27.12 O'NEILL- Fine. Stick to your guns then.
- 34.29.00 DANIEL- Jack!

- 34.29.29 O'NEILL- Daniel, we're going to do this my way.
- 34.33.08 CARTER/ENTITY (VO FILTERED THRU SYNTHESIZER)- You can't.
- 34.35.04 O'NEILL- General?
- 34.36.11 HAMMOND- You're damn right we can.
- 34.38.25 CARTER/ENTITY (VO FILTERED THRU SYNTHESIZER)- No. Please.
- 34.41.07 O'NEILL- Leave her.
- 34.43.26 CARTER/ENTITY (VO FILTERED THRU SYNTHESIZER)- I must preserve.
- 34.45.18 O'NEILL- If you want to preserve your world, leave Major Carter right now.  
O'NEILL (OS)- Stand down!  
O'NEILL (CONT)- Let her go!
- 35.29.29 FRASIER- We've got an emergency situation. Corridor 649.
- 35.47.12 TEAL'C- I believe the alien is attempting to return to the mainframe.

**END OF ACT FOUR**

**ACT FIVE**

- 37.13.05 FRASIER- Still no change? I don't know if she ever told you this, Colonel, but Sam made a living will. No extraordinary means.
- 37.36.12 O'NEILL- Yeah. She told me.
- 37.40.22 FRASIER- There's ah... There's no brain activity of any kind.  
FRASIER (OS CONT)- No brain wave for either Sam or the entity. She's being kept alive entirely on life support.  
FRASIER (CONT)- I think it's time to let her go, sir.
- 38.01.23 O'NEILL- Just, ah...give it a minute, huh?
- 38.31.02 DANIEL- Just thought you should know Hammond ordered the...  
DANIEL (OS CONT)- mainframe thing in the Malp room destroyed in case the entity managed to...  
DANIEL (CONT)- find its way back in there, somehow. It's probably what it was trying to do.
- 38.58.07 TECHNICIAN- Sir, we're go for a systems restart.
- 39.00.19 HAMMOND- Proceed, Sergeant.

39.01.18           TECHNICIAN- Yes, sir. All operational systems are back on line.

39.28.12           SILER- Get back!

39.24.14           TECHNICIAN- It's the Malp room, sir.

39.36.18           HAMMOND- SG-... 1

HAMMOND (OS CONT)- to the Malp room immediately!

39.53.06           SILER- I think our friend is back, sir.

39.58.23           O'NEILL- All right. Let's blow it.

40.03.10           DANIEL- Wait! Wait! Wait! Wait! Wait! Look at this!

40.11.03           TEAL'C- The entity.

40.12.06           DANIEL- No, it said it couldn't go back. It's Sam.

40.17.14           O'NEILL- Daniel, I shot her twice.

- 40.21.04 DANIEL (OS)- After it transferred Sam's...  
DANIEL (CONT)- consciousness out of her body.  
DANIEL (OS CONT)- You killed the entity...  
DANIEL (CONT)- after it put Sam into this... this thing. She's in here.
- 40.32.23 O'NEILL- Why? Why would it do that?
- 40.35.14 DANIEL (OS)- You demanded it.  
DANIEL (CONT)- You threatened to send an army of probes through to its home  
world.  
DANIEL (OS CONT)- Saving Sam and allowing itself to be killed...  
DANIEL (CONT)- was the only way to preserve its home world.
- 40.47.17 O'NEILL- Get me Hammond.
- 40.50.28 HAMMOND- Hammond.
- 40.51.27 O'NEILL- General, we've got a situation down here.
- 40.54.02 HAMMOND (VO FILTERED THRU PHONE)- Same here, Colonel. I'm on my way.
- 41.20.00 FRASIER- This EEG matches Sam's. I don't know how, but it's her.
- 41.25.10 HAMMOND- So what do we do?

41.26.20 FRASIER- There's nothing I can do, sir, but to provide a conduit for her to return into her own body.

41.36.26 TEAL'C- The entity has deceived us on several occasions.

41.45.15 HAMMOND- Go ahead, doctor.

41.47.23 FRASIER- Yes, sir. She's back!

42.29.00 O'NEILL- Hey, Carter. Where you been?

42.34.23 CARTER- It's gone?

42.36.25 HAMMOND- Yes, it is.

42.40.21 CARTER- I was shouting for you to hear.

42.45.09 O'NEILL- We heard.

43.01.07 **FADE TO BLACK. BEGIN END CREDITS.**

44.19.00 **LAST FRAME PICTURE**
